Take Your Reception To New Heights With Our New Audio and Visual Elements

Pre Recorded Audio or Video Messages

Before your reception we can schedule times to meet with you or various family members or even your best friends. We will take the time to record either a video or audio message to be played back at ANY time during your reception. **An Example:** We could record you and your fiancé on video. With this recording we can play your special message back during your cocktail hour. You can send a special message to your guests during the cocktail hour way before you even arrive at your reception.

Flashback Puzzles On Our Big Screen

Let's say you have one of those cute baby pictures of your fiancé or even an old photo of a grandparent. We can take these special photos and make them into a 30 second video puzzle. While there are no prizes involved your guests will enjoy trying to guess what is transforming on the screen during the dinner or cocktail hour.

Special Messages From Family And Friends.

Through our internet pre-requests web site we can accept messages from your family and friends. We can take all of these special messages and project them on our large screen. Your guests can even include a photograph as well.

Photo Montages

Seeing an old photo from the past is always fun. Whether you want us to create a professionally edited DVD for you, or just assist you in creating a PowerPoint style photo presentation on your own, we will. At your reception we can show this collage of photos to your guests at any time during the evening

Photos On The Big Screen*

One of our staff members can take digital photos of your guests at the event. Every 15-20 minutes these images can be projected onto our large screen. This continues for the entire evening or can stop at your discretion. After the event we can provide you with these digital photos on a CD for your use. Ask us about making the photos available through our website for your guests to view after the reception.

Bon Jovi – "Livin' On A Prayer"

Music Video Dance Party

With this option your guests will not only enjoy hearing their favorite music, but they will see it too. We will bring an up-to-date music video collection filled with today's hits, but most importantly the classics from the 1960's and on. The music will come to life on a large 10 foot screen; for larger events two screens.

*Your professional photographer may not want us to do this option; he/she must approve.
